During its meeting on December 16, 2015, the Campus Environment sub-committee approved the sub-committee meetings from the previous meeting. The sub-committee met in the Gold Room, Memorial Union from 1:00pm – 2:30pm.

Following the approval of the minutes, the sub-committee engaged in a conversation in an effort to develop a shared understanding of the sub-committee charge. This was an important first step to ensure that sub-committee members would enter future discussion from the same baseline. The sub-committee engaged in small group dialogue and then a collective group discussion to develop the shared definition.

The next step the sub-committee took was to develop a SWOT Analysis related to the priority areas related to a safe, welcoming and inclusive campus environment. Sub-committee members were asked to outline what they believed to be the important topical areas that needed to be addressed. It was explained that the results of the brainstorm session would be used in subsequent meetings in an effort to develop the strategic priorities.

Following the discussions, there was a brief update about next steps and the next meeting dates and then the meeting was adjourned.
